

Material Day & Exhibition

Growing Materials

05/06 November 2008

Registration: before the 29.10.2008

Wood as timeless material and for sustainable development. Nordic Materials and TreFokus proudly presents the material exhibition "Growing Materials, innovation in wood and fibers" with more than 150 cutting edge material samples. Get to know and feel new woods, new patinas and new features.

Explore the work of the architect Todd Saunders that combines Nordic sensibilities with environmental concerns. On the second day, Nordic Materials presents a creative working session with innovative materials, f.ex. Bamboo provided by Northern Light.

Focusarea:

Architectur, Building Industry, Carpentry, Design (Product-/ Interior-)

Program First Day: Growing Material Discours

Introduction / "Wood as a multi-sided eco friendly material to build and live with" by Aasmund Bunkholt/TreFokus.

Materials / Opening and Presentation of the Material Exhibition with its 159 material samples of innovation within wood and fibres.

Case study / "Explorations with wooden architecture" by Todd Saunders.

Dinner / Social Get together with a woody dinner (optional).

Second Day: Creative session and try out.

Work and experiment with innovative wood material, such as Bamboo, Bendywood and many more in our Model workshop.
